CSS Positioning Layout
Absolute Positioning Example
This is the main container.
The green box is positioned absolutely.
Absolute Box
Placed 80px from the top and 20px from the right.
Fixed Positioning Example
Scroll the page to see the fixed box remain in place.
Fixed positioning keeps an element at a specified position in the browser window.
Fixed Box

CSS Float Property
Float Left
The float property is used to position elements to the left or right of their container. Text and inline content can flow around a floated element. It is useful for creating simple webpage layouts.
The float right property places an element on the right side of its container. The text flows around the element wherever space is available.
Float Right
Content After Floating Elements
This content appears below both floated boxes.
